

INTERNATIONAL SURVEY ON REVENUE ADMINISTRATION (ISORA)

PROPOSED DATES | October 7-11, 2024

TARGET GROUP | Executives and senior managers wishing to secure a better understanding of the importance of performance management, measurement, and reporting for their organization and those responsible for supporting a tax administration's accurate completion of the survey each year.

DESCRIPTION | ISORA is the product of a partnership of the Asian Development Bank (ADB), Inter-American Center of Tax Administrations (CIAT), IMF, Intra-European Organization of Tax Administrations (IOTA) and OECD – and the active participation of tax administrations around the world. The online survey collects and provides annual data on tax administrations at the national level. This workshop will build on last year's ISORA workshop's focus on the importance of data management, performance management, measurement and reporting, and their linkages. During the course of this training, participants will contribute to the development of a report summarizing performance management challenges and approaches across CCAM revenue administrations. Using ISORA data and other relevant materials, the report will also provide an overview of these revenue administrations: their performance, profile and administrative and operations practices, and similar comparisons with other administrations of interest outside the region, to be determined. This activity will equip participants to complete ISORA 2023.

NOTE: The workshop report produced will become an input for a proposed inaugural meeting of senior tax administration officials to consider the establishment of a Revenue Administration Peer Network for countries in the CCAM region (February 10-11, 2025).

OBJECTIVES | Upon completion of this workshop, participants should be able to:

- XXXXXXXX
- XXXXXXX
- XXXXXXX
- XXXXXXx

LANGUAGE | The workshop will be delivered in English language, with simultaneous interpretation to Russian.
